

16338 – Intelligent Solutions Low Profile MiniBar

Features

- Exceeds SAE J845 (2013) Class 1 requirements (amber)
- CSA Approved
- Intelligent Real-Time Digital communication for up to 16 lights for pattern control, dimming, and synchronization/alternation through one wire connection
- Battery Check™ alerts you to critically low vehicle battery voltage
- Intelligent AutoDim™ technology adjusts light output for changing ambient light levels.
- Latest high efficiency LED technology to minimize current draw while maximizing the light output
- Adaptive thermal management for long LED life and colour consistency
- “Zero EMI” electronic design to prevent interference with sensitive radio equipment
- Premium internal optics with an anodized extruded aluminum base and UV resistant polycarbonate dome.
- Multiple user selectable flash patterns including rotating patterns
- Magnetic and Vacuum Magnet Mount available
- 10 year warranty

Specifications

Voltage	12-24
Power Consumption	0.8-3 Amps
SAE Class	SAE J845 Class 1
Flash Patterns	23
Lumens	2700
Mounting	Permanent Mount
