

Temporary Road Fence & Active Transportation Fence

Road Fence

The Road Fence and its unique coupling arrangement provides a robust singular system of interconnected barrier units. The galvanized steel base with a concrete ballast eliminates the need for bolting or sandbags and provides more space for pedestrians and cyclists with no trip hazards.

Assembly of the Road Fence is carried out by the specialized equipment of Ramudden Rentals including a teleskid and cranes. The patented rotating coupling system locks the barriers together and allows them to be placed at an angle up to 105 degrees.

Product Details:

- Complies with MASH TL-1 containment level
- Rigid steel construction with concrete ballast
- Able to handle height differences of up to 320 mm (13")
- No need for anchoring or bolting
- Effective length: 2850 mm (9 ft 4 in)
- Base width: 300 mm (11.8 in)
- Height: 1100 mm (3 ft 7 in)

Patented Coupling:

- Rotates freely around the rail
- Holds in the event of collision
- Easy to couple together

Galvanized
Steel & Concrete

958 lbs. / 435 kg

Active Transportation (AT) Fence

The Active Transportation (AT) Fence is used with the Road Fence and provides high-class protection for construction site workers, pedestrians, cyclists, and patio diners. No additional weights or feet minimizes the potential risk of tripping. The AT Fence can also be mounted on a foot plate as a traditional perimeter fence.

Product Details:

- Weight: 28 lbs. (12.5 kg)
- Dimensions: 1400 mm x 2100 mm (4 ft 7 in x 6 ft 11 in)
- Total height when fitted to Urban Barrier 2350 mm (7 ft 8 in)
- No sharp edges or loose parts
- High visibility yellow

Applications

Work Zones

The Road Fence is an essential asset for construction work zones. Its adaptable structure helps create secure perimeters, keeping workers and pedestrians safe from potential hazards. Plus, its modular setup simplifies deployment and reconfiguration as work zones evolve, promoting efficiency and minimizing disruptions.

Cyclist and Pedestrian Delineation

The Road Fence is a vital tool for safeguarding cyclists and pedestrians. Its flexible design can be installed along bike lanes and sidewalks, creating a protective shield against traffic. The durable construction enhances road safety, reducing accidents and improving the overall urban experience.

Patio Set Ups

The Road Fence is a versatile solution for outdoor patio dining. Its modular design allows for customizable layouts, creating private dining spaces while providing optimal levels of safety.
